EXPERIENCE

Developer @ Catalant Technologies
Jan 2017 - July 2017

Fullstack feature development on Angular application.
Built marketing page and navbar: https://gocatalant.com/how-it-works
Developed Flask, Python, Jinja2, SQLAlchemy application from the groundfloor, leading UX implementation in a timeboxed team.

Developer @ Edulift
June 2016 - October 2016

Built CMS for http://lingualift.com using MongoDB, MeteorJS & React.
CMS enabled team of language professionals to create textbook grade content for customers with widgets for image, video, text, vocab tables, and quizzes on web and mobile.
Built first prototype of Android app *Leaf* in React Native pulling from CMS content and a card-swiping UI.

Co-Founder @ Bevy
September 2014 - May 2016

http://joinbevy.com is a 2 Year, 3 person venture making intranet software.
Acted as CEO and lead developer. Designed and Developed the marketing page, Flux archetechture, logo, tech stack & business plan.
App uses React/React Native, Flux, MongoDB with an OAuth 2.0 secured RESTful API shared across Android, iOS and web.
Enabled Flux architecture to be shared across web and mobile platforms.
Packaged assets with Webpack transpiling from ES6 and LESS to CSS3.
Met with VCs and worked with Northeastern's IDEA program.

Developer & Lead Design @ Journal of Medical Insight
January 2010 - February 2012

Jomi is a surgical video journal located at http://jomi.com.
Designed and built the site on a 2 man team using Wordpress, MySQL & PHP.
Designed Collateral, Cards, Posters, logo & established brand aesthetic.
